Bexar County: The Chairman of the Republican Party of Bexar County (RPBC) stands with Israeli people in the defense of their right as a country and as civilized members of the global society to defend themselves and pursue those that have attacked them as they deem necessary and appropriate. We agree that the military might of the United States should be employed in a mutually aggressive action against all those that enter against the Israeli action against the Palestinian aggression.

The Chairman of the RPBC believes that Russia is an aggressive nation in many ways. We as a nation based on constitutional rights and a capitalist federation of states need to be perpetually vigilant in opposing the aggression of Russia and their State Communist form of government. The defense of Ukraine should be led by the European Union. As a member of the NATO alliance the United States of America is obligated to support the actions promulgated and initiated by NATO.
